

1.

This functionality of tracking the banners through the dots is not there visible in other three banners as in here in this sun banner. User should be able to change the banner by clicking on the dot (at every banner).

2.

This black strip hasn't yet been done away with.

Plz get it deleted completely.

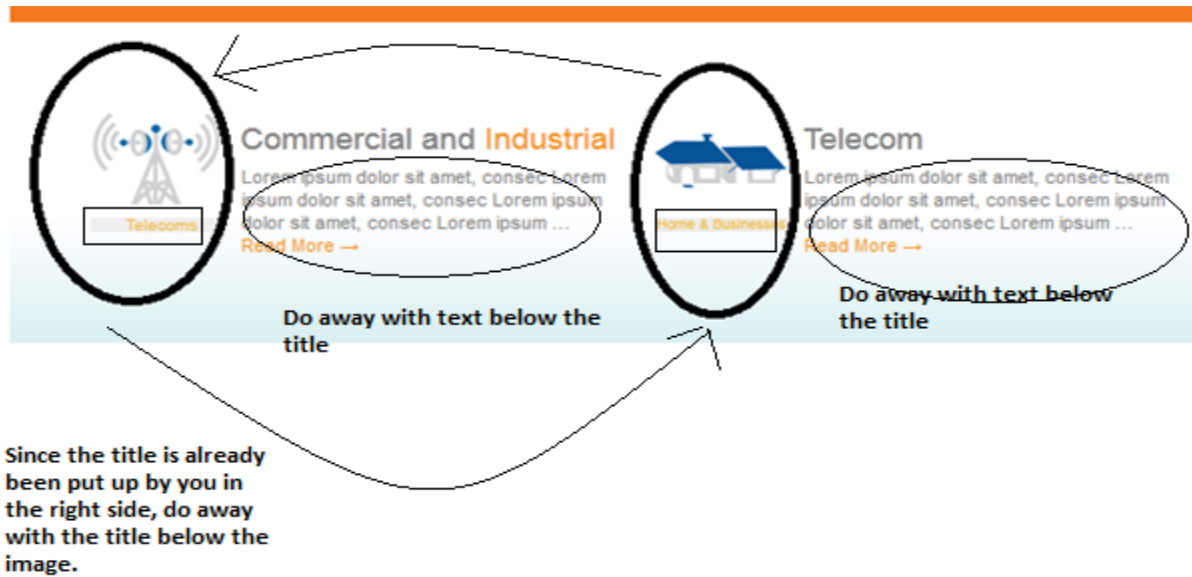

I have incorporated the same.

3.

3.1 The images need to be interchanged

||

I have incorporated the same.

3.2

Done

This is how it should look :

I have incorporated the same.

4. After the changes you made, the alignment of the paras went wrong. PSB the screen-shot :

"It is time for a sustainable energy policy which puts consumers, the environment, human health, and peace first."

-DENNIS KUCINICH

Prabuddha presents the ideal solution for the telecom service providers in form of Solar PV based captive power. Most of the towers that need off grid power are located at a place where there are no space limitations and this makes solar PV as an ideal choice. Also, network uptime can be managed in difficult hilly and terrain regions with the use of solar power.

Applications :

- Telecommunications companies
- Telecommunication towers
- Offices
- Mobile companies

BUSINESSES

Solar power makes financial sense for businesses and organizations of all sizes. Prabuddha's skilled commercial dealers will work with you to evaluate, specify, and install the right solar system to meet your needs

The Power Solutions offered by Prabuddha provides various advantages such as :

- Sustainability:** Solar energy conserves existing fossil fuels
- Environmentally friendly:** Producing clean electricity is good for the environment. It is your contribution to a brighter future for the next generation.
- Independence:** With a PV system you can produce your own electricity. You are not affected by rising electricity prices. And you can use the electricity for your own consumption.

High-yield: Solar electricity systems are often a more profitable and more secure investment than company shares

Improves lives in rural areas: Enhances the quality of life of underserved households, improves productivity at night and encourages the development of livelihoods.

Entertainment and education benefits: Rural electrification provides affordable electricity that gives rural households access to lighting, radio and television.

Safe: With solar lighting, there is a low risk for accidents

Features of the Prabuddha Solar Power System :

- Life of the System More Than 25 years
- Running Cost Almost Zero
- Maintenance Almost Zero
- Noise Level Compare to Generator Zero
- Carbon Credits Applicable for whole system

So, i have inserted an image .

Commercial and Industrial
